

North Legacy Transportation Corridor Study
Open House
Thursday, October 25, 2007
5 p.m. to 7 p.m.

Welcome! Tonight you will have the opportunity to review the information from the North Legacy Transportation Corridor Study and to provide the study team with your ideas, concerns, questions and feedback. Project representatives will be available to explain the material and address your questions.

Room organization: The room is organized into six information stations.

<p>Station 1: About the corridor study Information regarding the study area, timeline and objectives will be available.</p>	<p>Station 4: What the data said Evaluation data for each corridor studied.</p>
<p>Station 2: What we heard Summary of public issues identified through the study process and the public opinion survey.</p>	<p>Station 5: Next steps Information regarding the remainder of the North Legacy Transportation Corridor Study and the future of North Legacy.</p>
<p>Station 3: Corridors considered Maps and evaluation criteria for all corridor alignments identified and analyzed during the study.</p>	<p>Station 6: Public comment Maps to review and comment sheets for you to write your questions, concerns and suggestions for the study.</p>

Commenting Opportunities: There are several ways for you to share your thoughts, concerns or ideas with the North Legacy Transportation Corridor study team, including:

- Ask questions or provide comments to study team members (Team members will be wearing project name tags).
- Fill out a comment sheet and put it in the comment box at the public comment station.
- Fill out a comment sheet and mail or fax to the team by November 10, 2007.
- Contact us directly:

Bethany Matsumori, Public Involvement
Phone: 801.364.0088 ext. 109
Fax: 801.364.0072
Email: Bethany@wfandco.com
Address: 1371 East 2100 South, Suite 100 SLC, UT 84105

Thank you for attending the North Legacy Transportation Corridor Study open house. We appreciate your interest, questions and feedback.

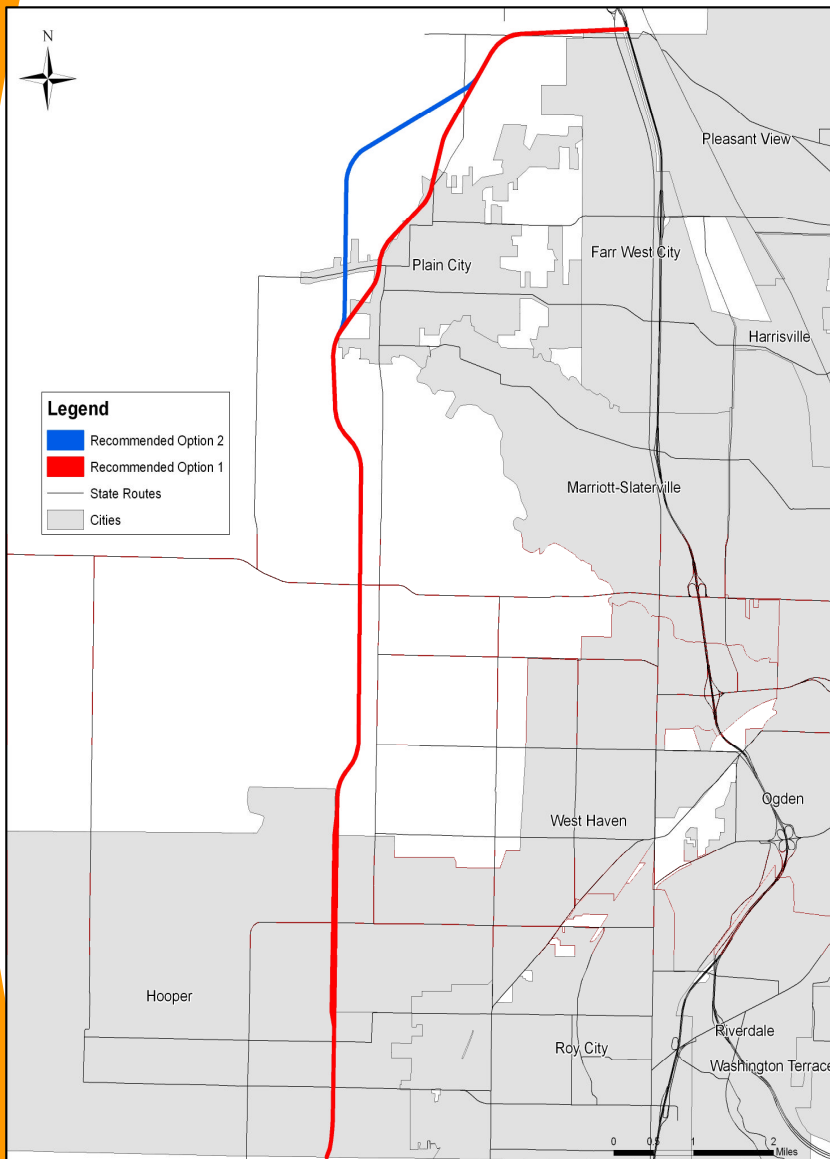

North Legacy Transportation Corridor Study

Weber County is experiencing tremendous growth and seeing an increasing need for new transportation facilities. In 2001 WFRC and UDOT conducted a study on the North Legacy project in Davis and Weber Counties. However, the study left many issues unresolved in Weber County.

The Wasatch Front Regional Council, UDOT, Weber County and local governments are conducting a supplemental study to the 2001 North Legacy Transportation Corridor Study. The primary objectives of the study include determining a logical connection to I-15 and establishing a corridor alignment and footprint for a future roadway.

Working with project sponsors, affected local governments, resource agencies and the public, the study has identified a potential transportation corridor to be preserved and has documented concerns and other issues that will need to be considered during a future environmental document. Public input and feedback is critical to the decision-making process and early planning for a North Legacy transportation corridor.

Please review the corridor alignment below and provide the study team with your comments.

What is the Recommended Corridor Alignment?

Over the course of the study, local cities and Weber County along with UDOT and WFRC have identified a potential transportation corridor for preservation.

Due to potential environmental impacts in the northern section of the corridor, two options will be preserved until future environmental studies are conducted.

The following table compares the environmental impacts between the two options.

Environmental Impacts	Option 1	Option 2
Acres of Wetlands	24.5	50
Acres of Agricultural Protection Areas	41.5	41.5
Acres of floodplain	7.6	10.6
# of total properties	416	349
# of total buildings/ structures	139	123
Length of the corridor	15 miles	15.4 miles

What is a corridor study?

A corridor study identifies and evaluates potential alignment alternatives for a future transportation facility. The study works to develop alternatives that satisfy the transportation need while avoiding or minimizing impacts to the surrounding communities and environment. Several corridor alternatives have been evaluated based on their benefits and impacts on transportation, economic, social and environmental factors.

Public involvement is important to the study process and members of the community should review the alternatives, the recommended corridor alignment and provide input to the Steering Committee and study team regarding the project. Once an alignment is agreed upon, local governments will adopt the alignment into their transportation and master plans to prevent development within the alignment.

What is corridor preservation?

Corridor preservation protects land identified for a future roadway from encroaching development. Early identification of the needed roadway land can help reduce project costs by securing the land before its value rises or before it is developed.

Local governments can also use their zoning and subdivision authority to further protect the corridor from development and cities have the right to preserve land in advance for roadways that are needed in the future. The goal of the North Legacy Transportation Corridor Study is to establish a corridor that the cities and county agree upon and will incorporate into their transportation master plans.

When will North Legacy in Weber County be built?

Funding has not been identified for the project and a construction timeline has not been decided. Currently, the project is listed on the WFRC regional transportation plan for possible construction in 20 to 30 years.

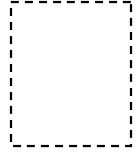

What is the role of the Steering Committee?

The North Legacy Transportation Corridor Study Steering Committee includes local elected officials and city staff with planning and engineering expertise. The committee will guide the overall study process, encouraging and reviewing concerns, issues and input from the community. Technical information and public feedback will be evaluated regarding the alignments and the group will agree upon an alignment to be preserved.

How can I get more information?

If you would like more information about the project, please contact Bethany Matsumori at 801.364.0088 ext. 109 or at Bethany@wfindco.com. Project representatives are happy to discuss issues, questions and concerns.

Return Address:

North Legacy Transportation Corridor Study Team
1371 East 2100 South Suite 100
Salt Lake City, UT 84105

Before mailing please fold in half and tape closed.
Thank you for your participation.
